* This subject index conforms to the catergories established in *THE OR/MS Index, 1952–1976.* The 1952–1976 cumulative index was compiled by Kneale T. Marshall and F. Russell Richards and the 1976–1981 cumulative index was complied by John W. Tolle and Richard E. Stone. The indices were published in 1978 and 1983 by the Institute of Management Sciences and the Operations Research Society of America. An "Index to the Index" appears in each volume.

Higgins, Alaskan oil export ban, 1173–1202
Oren, Optimal supply of a depletable resource, 277–292

NETWORKS/GRAPHS
Balinski, Algorithm for assignment problem, 527–536
Burns, Continuous network approximations, 469–490
NETWORKS/GRAPHS, APPLICATIONS
Foulds, Applied graph theory, 1091–1106
NETWORKS/GRAPHS, DISTANCE ALGORITHMS
Glover, Shortest path algorithms, 65–73
Kamburowski, Stochastic shortest route problem, 696–698
Kulkarni, Distribution of shortest path lengths, 1389–1393
Laporte, Distance algorithms, 1050–1073
NETWORKS/GRAPHS, MULTICOMMODITY
Martins, Maximal funnel flow, 537–547
NETWORKS/GRAPHS, STOCHASTIC
Kulkarni, Path lengths in stochastic networks, 1389–1393
NETWORKS/GRAPHS, THEORY
Padberg, Valid inequalities for fixed charge networks, 842–861
NETWORKS/GRAPHS, TRAVELING SALESMAN
Laporte, Traveling salesman, 1050–1073

O

ORGANIZATIONAL STUDIES, MANPOWER PLANNING
Stanford, Mobility in manpower systems, 109–125

P

PHILOSOPHY
Keeney, Evaluating strategies for equity, 955–970
PROBABILITY, DISTRIBUTION COMPARISONS
Suresh, Distribution comparisons, 1146–1153
PROBABILITY, DISTRIBUTIONS
Snyder, Phase-type distribution in queueing approximations, 183–202
PROBABILITY, ENTROPY
Pinedo, Distributions, 1381–1388
PROBABILITY, MARKOV PROCESSES
Grassman, Regenerative analysis, 1107–1116
Sennott, Ergodicity of multidimensional Markov chains, 161–167
Sheskin, Partitioning algorithm for steady state probabilities, 228–235
PROBABILITY, STOCHASTIC MODEL APPLICATIONS
Bagchi, Stochastic models, 1278–1298
Coffman, Probabilistic analysis of scheduling algorithms, 548–561
David, Time-dependent optimal stopping, 491–504
Frydman, Markov chains as models of credit behavior, 1203–1214
Horen, Pairing teams in single-elimination tournaments, 249–262
Kamburowski, Shortest route problem, 696–698
Pinedo, Stochastic model applications, 1381–1388
Schoenfelder, Forecasting population movements using life tables vs. Markov chains, 126–133
Stanford, Renewal models for manpower service times, 109–125
PRODUCTION/SCHEDULING
Martel, Uniform processors with memory constraints, 1360–1380
Pinedo, Production/scheduling, 1381–1388
Posner, One-machine scheduling problems, 562–574

Potts, Single machine total weighted tardiness problem, 363–377
Stecke, Planning and control of flexible manufacturing systems, 882–910
PRODUCTION/SCHEDULING, CUTTING STOCK
Beasley, Two-dimensional cutting, 49–64
PRODUCTION/SCHEDULING, DETERMINISTIC
Ishii, Optimal speeds of uniform processors, 346–363
Posner, Weighted completion times with deadlines, 562–574
PRODUCTION/SCHEDULING, LINE BALANCING
Queyranne, Complexity of heuristics, 1353–1359
PRODUCTION/SCHEDULING, MATERIALS HANDLING
Nawijn, Unloading policy for conveyor-serviced work station, 625–643
PRODUCTION/SCHEDULING, PRODUCT DESIGN
Tryfos, Garment design, 678–684
PRODUCTION/SCHEDULING, STOCHASTIC
Bagchi, Job shop scheduling, 1278–1298
Coffman, Parallel machine scheduling, 548–561
Suresh, Stochastic flow shop, 1146–1153
Suri, Flexible manufacturing systems, 606–624
PROFESSIONAL, OR/MS EDUCATION
Ruth, Careers in OR/MS, 699–703
PROGRAMMING, COMPLEMENTARITY/FIXED POINTS
Greenburg, Computing fixed points, 935–949
Mathiesen, Nonlinear complementarity, 1225–1250
PROGRAMMING, FRACTIONAL
Warburton, Linear fractional programming, 74–84
Wolf, Parametric method for solving the linear case, 835–841
PROGRAMMING, GEOMETRIC
Rijckaert, Estimation of Lagrange multipliers, 85–93
PROGRAMMING, INTEGER: ALGORITHMS
Burr, Nonlinear integer problems, 726–745
Chakravarty, Optimal inventory groupings, 820–834
Derigs, Statistical estimators in combinatorial programming algorithms, 1024–1049
Johnson, Integer programming algorithms, 803–819
Martin, Tightening algorithm for mixed-0/1 programs, 505–526
PROGRAMMING, INTEGER: APPLICATIONS
Karmarkar, Dynamic production planning, 326–345
Park, Partitioning of integer linear program, 690–695
Sonderman, Mathematical programming in cancer therapy, 705–725
Watson-Gandy, Mini-sum location, 784–802
PROGRAMMING, INTEGER: BRANCH AND BOUND
Beasley, Two-dimensional cutting, 49–64
Martin, LP based branch and bound, 505–526
Potts, Single machine sequencing, 363–377
Schrage, Sensitivity analysis for branch and bound, 1009–1023
PROGRAMMING, INTEGER: CUTTING PLANES
Martin, Cutting planes to reduce duality gap, 505–526
Schrage, Sensitivity analysis with cutting planes, 1008–1023
Sherali, Cutting plane algorithms, 928–933
PROGRAMMING, INTEGER: DYNAMIC PROGRAMMING
Schmidt, Two-stage production assembly, 1130–1145
PROGRAMMING, INTEGER: ENUMERATIVE
Burr, Exact solution by greedy algorithm, 726–745

PROGRAMMING, INTEGER: HEURISTIC
Drezner, Algorithms—heuristic, 772–783
Queyranne, Assembly line balancing, 1353–1359
PROGRAMMING, INTEGER: THEORY
Padberg, Valid inequalities for mixed integer problems, 842–861
PROGRAMMING, LARGE SCALE SYSTEMS
Birge, Large scale systems programming, 989–1007
PROGRAMMING, LINEAR: ALGORITHMS
Balinski, Assignment problem, 527–536
Swarc, Transportation algorithm, 1215–1224
PROGRAMMING, LINEAR: PARAMETRIC
Swarc, Parametric analysis, 1215–1224
Wolf, Fractional programming, 835–841
PROGRAMMING, MULTIPLE CRITERIA
Warburton, Bicriterion linear fractional programming, 74–84
PROGRAMMING, NONLINEAR
Drud, Nonlinear programming, 218–222
PROGRAMMING, NONLINEAR: ALGORITHMS
Hansen, Facility location, 1251–1265
Mathiesen, Sequence of linear complementarity problems, 1225–1250
Rijckaert, Geometric programming, 85–93
PROGRAMMING, NONLINEAR: APPLICATIONS
Higgins, Oil exports, 1173–1202
PROGRAMMING, NONLINEAR: LINEAR CONSTRAINTS
Kalantari, Construction of difficult global minimization problems, 222–227
PROGRAMMING, NONLINEAR: TESTS
Drud, Nonlinear test problems, 218–222
Kalantari, Construction of difficult global minimization problems, 222–227
PROGRAMMING, NONLINEAR: THEORY
Kalantari, Construction of difficult global minimization problems, 222–227
PROGRAMMING, QUADRATIC
Ishii, Quadratic speed costs of uniform processors, 346–362
PROGRAMMING, STOCHASTIC
Birge, Stochastic programming, 989–1007
PROJECT MANAGEMENT
Dodin, Completion time of the project, 862–881
PROJECT MANAGEMENT, PERT
Dodin, Bounding the distribution function of the project duration, 862–881

QUEUES
Fuhrmann, Queues, 1117–1129
Hadidi, Queues with partial correlation, 203–209
QUEUES, APPLICATIONS
Hadidi, Waiting time, 203–209
QUEUES, APPROXIMATIONS
Eng, Decomposition using delayed column generation, 459–464
Snyder, Iterative approaches, 183–202
QUEUES, CYCLIC
Harrison, Cycle time distribution, 464–468
QUEUES, DIFFUSION
Yao, Diffusion approximations, 1266–1277

QUEUES, FEEDBACK
Fuhrmann, Feedback, 1117–1129
QUEUES, LIMIT THEOREMS
Grassman, Imbedded Markov process, 1107–1116
QUEUES, MARKOVIAN
Heyman, Analysis of a new queue discipline, 397–403
Sennott, Stability of Markovian queueing systems, 161–167
QUEUES, MULTICHANNEL
Lipsky, Networks of queues, 911–927
Szarkowics, Optimal control, 664–660
Yao, Multichannel queues, 1266–1277
QUEUES, NETWORKS
Harrison, State space probabilities normalization, 464–468
Lipsky, Explicit solutions of *M/G/C//N*-type loops, 911–927
Stecke, Closed queueing network model, 882–910
Suri, Closed queueing networks, 606–624
QUEUES, OPTIMIZATION
Berman, Optimization with queueing objective, 746–771
QUEUES, PRIORITY
Bagchi, Priority queues, 1278–1298
Heyman, A preemptive rule for loss systems, 397–403
QUEUES, SIMULATION
Kelton, Simulation, 378–396
QUEUES, SWITCHING
Orlin, Some very easy knapsack/partition problems, 1154–1160
Szarkowicz, *M/M/S* queueing system, 644–660
QUEUES, TRANSIENT RESULTS
Kelton, Transient results, 378–396

R

RECREATION/SPORTS
Gottlieb, Stochastic model of blackjack, 971–988
RELIABILITY
Hudson, Reliability bounds for multistate systems, 153–160
RELIABILITY, FAILURE MODELS
Stanford, Failure-rate properties of manpower service times, 109–125
RELIABILITY, REPLACEMENT
Thomas, Replacing frameworks before failure, 404–411

S

SIMULATION, EFFICIENCY
Kulkarni, Efficient Monte Carlo implementation, 1389–1393
SIMULATION, STATISTICAL ANALYSIS
Rubinstein, Control variates, 661–677
STATISTICS, BAYESIAN
Clemen, Revision with dependent information, 427–442
STATISTICS, CORRELATION
Rubinstein, Variance reduction, 661–677
STATISTICS, DESIGN OF EXPERIMENTS
Kolonko, Sequential design of Bernoulli experiments, 413–426

STATISTICS, ESTIMATION
Derigs, Bounds in combinatorial programming, 1024–1049
Frydman, Estimation and testing of Markov chains and mover-stayer models, 1203–1214
STATISTICS, PATTERN ANALYSIS
Green, Two levels of servers, 168–182

T

TRANSPORTATION
Burns, Freight distribution, 469–490
TRANSPORTATION, AIR
Rothstein, Operations research and the airline overbooking problem, 237–248
TRANSPORTATION, MASS TRANSIT
Glover, Design of mass transit systems, 65–73
